

## **T2 Utility Engineers**

Did the MBTA have any prior program for the mark out their underground assets or will this be the first effort?

A: Yes, we have a contract in place and just extended it until this new Contract IFB 171C-22 is awarded and executed.

Is this contract subject to Prevailing Wages? If so, which prevailing wage labor classification should use?

A: Prevailing wage information has been added.

Would it be possible to provide a breakdown of the tickets that reflects quantity marked-out in field or clear/no conflict?

A: MBTA Power Department response- Please see attached Utility Locate Report for November 2022.
